

July 14th, 2012, the Emmabuntüs 2 make his Free revolution ;-)

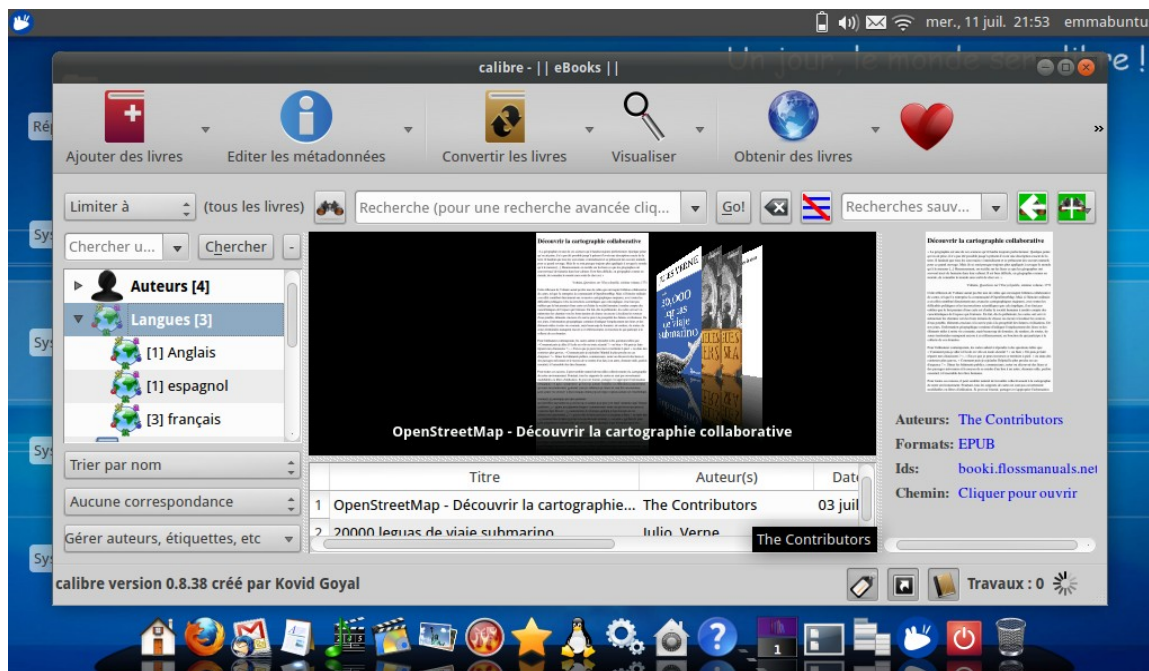

The Emmabuntüs team is happy to announce the publication on July 14 2012, of the first stable release for Emmabuntüs 2 1.00 based on a [Xubuntu 12.04](#). This distro was designed to facilitate the refurbishing of computers given to human help associations, especially [Emmaüs](#) communities (where the name come from) and promote the discovering of [Linux](#) and [GNU](#) by beginners. This thousandth Linux distro is intended to be sleek, accessible, equitable.

For this version, the following changes have been made :

- Implementation of 7 languages in [cairo-dock](#) (En, Fr, Es, Ar, De, It, Pt) in addition of 3 dock levels for each language (experts, beginners and children) with “one click” switch

- New script for easy installation of [Calibri](#) font for a better interoperability with a certain office suite ;-)
- Better videos support with 2 versions of the Adobe Flash reader you can choice to install or not ;-)
- Better integration of free culture, with the possibility to install this at the end of installation process. Elsewhere, we will use this functionality to propose a flash disk named « [VRP du Libre](#) » (« Free software salesman ») from actual month on [Multisystem](#) site, and containing a library of 300 [eBooks](#) from the site, 13 music albums from [Jamendo](#), and 3 versions of Wikipedia (En, Fr, Es), all this on a 16 Go high quality flash disk from Transcend brand

Addition of following softwares comparing to Emmabuntüs 10.04 previous version :

- Communication : parental control filter (Blocksi) and anti-tracking (Ghostery) in browsers, and integration of the cloud computing like : UbuntuOne , Dropbox, and so on
- Office : Calibre, Grammatical extension “Language tool” included in LibreOffice
- Audio : Easytag, Sound Juicer, Sound Converter, Pulseaudio-equalizer
- Video : Smplyer, Openshot, WinFF
- Photo : Pinta, Gimp
- System tools : BleachBit, Déja Dump, TeamViewer, Gufw, MintNanny, XI-wallpaper, Flash-Mint

This release will be available on July 14, 2012, from our front page : emmabuntus.org, but also from Freetorrent.fr

Here are some links to install and use this distro:

- [List of applications](#)
- [Installation](#)
- [Personalization](#)
- But also the traditional [FAQ](#)
